

Specialty Retail Made Stress Free

Streamline Your Specialty Retail Operations with Revel Systems

Leverage Revel's customizable point of sale (POS) and feature-rich business management tools to maximize your profits and make data-informed decisions about your operations. Optimized for managing multi-location businesses, Revel's platform pairs intuitive design, first-class support, and the features you need to easily run your business. Here's a quick look at what you can expect:

Improved inventory management

- Revel's stocktake feature allows for near real-time tracking of count fields, and inventory reporting of store-level metrics are easy to digest and easy to act on through Revel's intuitive interface. Increase efficiency and grow revenue with data-driven insights.

First-class customer experience

- Online ordering and mobile order takers empower staff to deliver a fast and friendly experience. Integrate customer relationship management (CRM) for memorable checkout, personalization, and on-going communication.

Increased employee satisfaction

- Manage payroll, scheduling and permissions directly from a central management console. With Revel, you can streamline your administrative paperwork, allowing you to focus on big picture items.

“

After switching to Revel, we were able to get through our lines quicker and accommodate more customers. The increased speed helped sales climb by 20 percent. Revel's specialized reports also tell me exactly what I need to put on the menu each day.”
